

THE CITY OF
SAN DIEGO

Sewer Group 753 Fact Sheet

Project Overview:

Sewer Group 753 is part of the Sewer Main Replacement Program as mandated by the Environmental Protection Agency (EPA). This project is located in the Centre City Community area. This project consists of the replacement of approximately 5,395 linear feet (1.05 miles) of existing sewer mains and all other work and appurtenances. It also includes the installation of curb ramps and slurry seal. This project will decrease sewer main breaks and stoppages and improve the sewage collection system within the area.

The existing sewer has deteriorated and will be replaced with state-of-the-art materials that are far more resistant to deterioration, breaks, and blockage and will be upsized to meet current standards. This upgrade in your community will occur within the coming months utilizing open trench construction.

The streets affected by construction operations are 12th Ave., 14th St., 15th St., Russ Blvd., 16th St., 17th St., and E St. These areas are shown on the attached site map.

Construction Information:

Construction is anticipated to begin July of 2011 and estimated to complete March of 2012. Normal working hours are between 8:30 a.m. and 3:30 p.m., Monday through Friday. These working hours may be adjusted to fit the community's needs and address unforeseen events. Noise from the contractor's operations will not exceed limits established by applicable laws and regulations in the working areas.

Traffic & Safety:

Traffic Control Plans have been prepared for the streets within the project and will be implemented during construction as approved by the City. The contractor will also be directed to keep the area as clean as possible from dirt, dust and debris at all times.

Cost:

Total project cost is approximately \$2,031,000.
